William Rodarmor ('60) was kind enough to send us these updates on two of his classmates:

- **Andre Vasu** ('62), who practices thoracic surgery in Punta Gorda, Florida, avoided a close encounter of the blast kind with Hurricane Charley, whose 150-mph winds tore his roof and demolished his medical practice building. In his very grim photos, his office looks like a Baghdad bombing. Good thing André himself had the good sense to be 1,400 miles away in Rhode Island. He writes: "We watched on the radar screen as Charley went directly over our house. My wife Peg said, 'Good thing we weren't home. I would have been out of there at the last minute and would have been hit in the head with a flying 2 x 4.' My F-27 sailboat went airborne, flipped 180 degrees, and smashed on the dock, amputating three ten-inch-thick pilings. Need new roof coverings but contents of home OK. Medical office destroyed. But all is well and we will come back to fight another day."

- William continues: "**Geoffrey Morson** ('62) has made a splash of another kind, by contributing half a dozen biographies to the massive new Oxford Dictionary of National Biography. "All my articles are on fairly specialized subjects," Geoffrey writes from Cambridge, "but Hamilton will have a quite wide appeal." That's putting it mildly. An 18th century diplomat, Sir William Hamilton was famous both as an art collector and a jilted husband. His lovely young wife Emma took up with Lord Nelson, the already-married hero of the Nile, and they all then lived together openly in London. "That would create a stir even today," writes Geoff. "In 1800, it was an outrage, but people had to swallow it. Nelson was the military hero of his era and was needed to defeat Napoleon at sea (which he did). It would be as if Laura Bush ran off with Dominique de Villepin. Or Madonna with Bill Clinton. Or Dolly Parton with Vladimir Putin."

[Editor's Note: We don't know whether Geoffrey knew it when he quipped about Laura Bush and Dominique de Villepin, but Dominique is a LFNY graduate, class of '71.]

- **Ronnie Hess** wrote: "I'm in France for the year and will reconnect with Colette Friedlander and Violaine

Coulondres. Colette has remained a close family friend over the years.....I'm teaching school in Dijon for the year and will return in May to the United States where I am director of communications in the Division of International Studies at the University of Wisconsin. I'm in Dijon not only to teach English at the "college" level but also to do research on French education. Reconnecting with some anciens élèves would be interesting for me. Similarly, if you know of any anciens profs who are in France I would also like to get in touch with them. My mother, Tina Hess, who taught English at the Lycee, lives in Florida and will be 94 on October 24. She still thinks fondly of her many years at the Lycee."

● **Marjorie Zilliacus Wright** recently sent in this news: «I just found the Lycée website. I have lived in Marlboro, VT for the past 30 years and visit New York often, but I have lost contact with all my classmates. I have seen Suzanne Slesin's name in the Times and in books for years! Also saw Pierre Sauvage's film about his life in WW 2 on TV. Does M. Kasriels still run his summer camp? I see the ad in the New York Times every year! I married soon after leaving the Lycée in 1962. My husband is a potter (his work can be seen at Gallery Dai Ichi Arts on 57th St.) We lived in Washington DC for 4 years, followed by 3 years in Japan, and since then have been here in Vermont. We have two sons and a 5 year old granddaughter. My French is probably OK, but difficult to write after too many years of no practice. I studied towards a MAT degree in teaching ESL and French, but ended up as a travel agent for 17 years. (Didn't really want to teach high school French!) Just stopped working in December. I would love to hear from anyone who may remember me.»
