● **Samantha Sherman** (LSY: 4eme in 1984) wrote: "I would like to let my 1988 classmates know that I had a daughter, Veronica Sherman-Kim, on August 11, 2015, who is the light of my life. We live in Brooklyn, NY and I would love to reconnect with fellow alumnae/alumni, especially anyone who is local and/or has a toddler at home. Although I speak to Veronica primarily in English, she does surprise me with French words now and then. Perhaps she picked them up from Valerie Picard's ('88) old *Martine* books and classic *Rondes et Chansons de France* 45's."

● **Johanna Bialkin** (LSY: 9eme in 1979) is the owner of a furniture store called Aldea Home, in the Mission district of San Francisco where "you can find just about any type of furniture. From vintage, modern, artisan, and thrift store loot, to super affordable and practically unreachable—it's easy to get lost in the world of furniture hunting."

● **Nicolas Louit** (LSY: Terminale in 1988) is the Director of IT and Services (Europe) at Procter and Gamble, where he has been working since 1991, right after he graduated from Carnegie Mellon University with a B.S. in Information and Decision Systems.

● **Sandra (Toupet) Armstrong** (LSY : 1ere in 1987) recently co-founded the *Grand Musée du Parfum* in Paris and has been appointed as its *directrice générale*.

"Le Grand Musée du Parfum, France's first independent museum devoted solely to the art of fragrance, opens at 73 Rue du Faubourg Saint Honoré . The French love of perfume is legend-making. Fragrance is in fact France's third largest export when you also include cosmetics in that beauty-and-business discussion. How surprising then that the first museum devoted to the olfactory art has only just opened. At the end of 2016, a

perfume museum devoted to the art, manufacturing and creation of fragrance debuted in the City of Light, what we usually refer to as the perfume capital of the world.

The museum (and its founders Guillaume de Maussion, Dorothée Lepère and **Sandra Armstrong**) promises a multi-sensorial experience for museum goers. Visitors will learn about the history and science of perfume making, and they'll also be privy to video and sound installations.....The best part? Museum goers will be able to smell many different perfume offerings. From perfumery's base ingredients to specific isolated notes to brand-name picks. As an added bonus, history buffs will be happy to hear they'll learn about the first man-made perfume. Apparently, it was a woody compound used by Ancient Egyptians. And yes, you can smell it. This, plus much more at a museum that tailored to perfume lovers the world over."

- **Laura Buccellati** (*LSY: 11eme in 1977*) began a new career in 2014 as a real estate professional with Sotheby's International Realty, in Miami Beach, Florida. Prior to that, she was the founder and owner of Laura Buccellati, LLC, a high-end jewelry and handbag company. However, in April, 2014 "Italian jewelry designer Buccellati Holding Italia SPA won a trademark infringement verdict in Florida federal court against Laura Buccellati, a granddaughter of company founder Mario Buccellati who runs an unaffiliated handbag company.

TOP: Sandra (Toupet) Armstrong ('88); MIDDLE: Lisa Gelobter ('88); BOTTOM: Samantha Sherman ('88)

A Florida jury said the use of “Laura Buccellati” as a trademark for the high-end bag company was likely to confuse consumers into believing the granddaughter's brand was somehow connected to the much-older Buccellati jewelry company. A judge later entered judgment against her and against Laura Buccellati LLC for infringement, unfair competition, false designation and false description of fact. The jurors refused, however, to find that the younger Buccellati's actions were willful, and they also cleared her of dilution and false advertising claims. Business partner Lillian Azel was cleared of all charges, and Buccellati jewelry was awarded no damages....."

● **Carole Dupeyron** (*LSY: Terminale in 1988*) " is an unusual artist; after graduating from business studies (Columbia University 92 - HEC 94), she realised that her attraction to painting was too strong to have a traditional career. That was going to influence her work over the next decade: pure lines, plain colours and the extensive use of lights are reminiscent of some of her favorite skyscrapers. She now works in her studio in Paris where she lives with her husband and her three children."
