● **Stan Wojewodzki** wrote: "After 3 years as media partner to the Council of Foreign Relations in New York, advising governments in Central America and the Caribbean on international communications, I have joined the Haitian government on a full time basis as special advisor to the co-chairman and executive coordinator of the Presidential Advisory Council for Economic Growth and Investment.

This international advisory board, co-chaired by President Clinton and a senior Haitian presidential envoy, is comprised of seven former heads of state, CEOs of multinational companies, international bankers, private equity investors as well a Nobel peace laureate. It has as its principal mission advising the Haitian government on its economic development and investment attraction efforts.

I welcome any LFNY alumn and students to inquire about this country's efforts to rebuild following the earthquake which devastated its already weak economy and institutions. This is a true nation building effort, as challenging as it is noble. Students and alumni of Haitian origins should inquire about what is going on in their country. The country needs investments and talents to participate in this reconstruction."

Prior to joining Goldman Sachs, Tamim was the Chief Financial Officer for Qatargas Transport Company (Nakilat). Prior joining Nakilat, he served as the treasurer for Qatargas Company. Prior to joining Qatargas Company, Tamim worked as a trader with Qatar National Bank, where he traded a range of financial products.

Tamim holds a BA in International Business with a minor in Political Science from George Washington University, and an MBA from the American University - Washington, D.C."
