

LES DOCTEURS DU LFNY

This is the 4th in our series of articles on various categories of LFNY alumni. The first two were *Les artistes du LFNY* and *Les auteurs du LFNY*. The third was *Les YouTubiens du LFNY*, which gave Internet links to videos (many on YouTube) of LFNY alumni and former staff. (Click on "related links" to the right, under the pictures, to access the first three parts of this series.)

In *Les docteurs du Lycée Français de NY*, we give a list, and bios and photos where available, of all the LFNY alumni who, to our knowledge, are or were *docteurs* in various fields of medical science (using the French definition of the term *docteur*). In the future, our next series will be on *Performing Artists of the LFNY*. After that, we'll probably run out of ideas!

We present this series in two parts (preceded by a bit of trivia). First, a listing of all *docteurs* by specialty (for MD's) or by profession (for others), and then a listing by class year of the same people. For purposes of this article, we include alumni who are *docteurs* in the health care field. While most of those listed are MD's, we also include DVM's, DDS's, PhD's in Psychology, Nutrition, Biology, etc.

NOTE: If we have incorrectly listed your specialty, profession, or other information, or if you are not listed here but would like to be, please write to us at:

Dr. Denis Logerot: « Depuis toujours attiré par les animaux de toutes sortes, je deviens vétérinaire en 1981 et m'installe dans l'Ouest de la Lorraine (plus précisément en Meuse); je pratique déjà la photographie, et mes activités de loisirs sont orientées vers la Nature. Plus tard je passe le brevet de pilote ULM, catégorie multiaxes (avions ultralégers), autre activité qui m'attirait par le regard différent que le vol permet d'avoir sur la Nature. Mes sujets photographiques préférés sont les animaux en liberté dans leur milieu, les paysages dans lesquels l'Homme sait se montrer discret, et d'une manière générale tout ce qui témoigne de la beauté et de la diversité de la Nature. Logiquement amené à conjuguer vol et photographie, je suis contacté en 2002 par Réseau Ferré de France (RFF) pour un reportage photographique aérien sur le gigantesque chantier de la LGV Est (trois cents km de chantier comportant un ouvrage d'art tous les km). Je crée alors "Photargonne", petite entreprise me permettant la commercialisation de mes images. Ce reportage fut le premier d'une série se terminant en 2006 avec la fin du chantier. Je suis équipé en matériel de prise de vues numériques, ce qui offre l'avantage, entre autres, de contrôler mes images jusqu'au tirage papier final. Je pratique également la photographie aérienne pour d'autres entreprises (site web, illustration en communication), pour des collectivités territoriales (Communes ou Communautés de Communes), pour des particuliers désirant des vues aériennes de leur propriété, mais aussi et bien sûr pour mon plaisir personnel. » (<http://www.denislogerot-photargonne.com/auteur/index.asp>)

Dr. Nora El Goulli (Pharm.D) is the Director of Team Strategy at groupH Ltd and “holds a Doctor of Pharmacy degree [Faculte de Pharmacie de Tours] and an MBA [Kellogg School of Management, Northwestern U, 1994]. She spent 10 years working on mass vaccination programs in 80 countries in Asia, Africa and Latin America and has always been passionate about improving access to healthcare in the third world. At Pasteur Vaccins, the vaccine arm of the Pasteur Institute in Paris, she was responsible for the world's first viral Hepatitis B vaccine. Her role involved working with public health authorities to promote the use of the vaccine in their countries. The vaccine is now a standard component of the standard vaccination program across the third world. During a holiday visit to Roatan, she witnessed the devastating shortages of medicines at the public hospital. The hospital pharmacist had no purchasing budget and no access to suppliers. She was disempowered by the system and frustrated. Nora thought that it was feasible to sustainably improve the situation. She founded Medicines for Roatan in 2006.”

Dr. Ellen Simone Passloff "was born.....in New York City.....Instead of reading Nancy Drew Novels in High School, Ellen would read her Dad's Clinical Symposia magazines.....After she graduated from Horrace Mann High School in

Riverdale, New York, she went to Yale University and attended Medical School at the University of Pennsylvania.....It was in June or July of 1990 when I first met Ellen. She was a young intern at Seattle Children's Hospital. I had worked with many interns and residents and I have to say that Ellen was my favorite. She was always happy and upbeat, a team player, respectful of everyone, incredible with the children she treated and their families.....After completing her residency, Ellen was a Critical Care Float MD in the Emergency Room and the Infant ICU at Children's. She also did some Locum Tenens at Columbia Health Center and Southwest Public Health prior to forming a partnership with Doctors Rhonda Levitt and Eric Chrisinger and opening Northwest Pediatrics. When Ellen isn't busy practicing medicine, she loves to spend time with her two sons, back country skiing, backpacking, climbing, cycling and running.....I asked Ellen what she liked best about being a pediatrician. Her response was, "I love the honesty and enthusiasm of the children. I love getting hugs from my patients and seeing those sweet children get well so quickly. I love being able to be a positive influence in the lives of my patients and their families."

Dr. Georges Mesplou studied chiropractic at the Franco-European Institute of Chiropractic in Paris and graduated in 1992. "Since then I have specialized in soft techniques. I have worked as a chiropractor since 1992 and came/moved to Holland in 1999. I grew up speaking French (was raised in the French language). My mother is from Switzerland, my father from France. In my youth, I lived in the US for a while. It was there that I was introduced to chiropractic. I was always impressed by how my father felt better after each treatment. After five years in the French Navy, I was searching for something more "humane" and began studying chiropractic. In the world of/field of chiropractic, there exist many different methods, wherein each chiropractor is unique in his/her treatment. My approach with what I learned is to only use what I feel will be the most effective. I am proud of the results which after 20 years still continue to develop/grow." <http://chiropractorharderwijk.nl/chiropractoren/georges-mesplou/>

She did her training at Stanford School of Medicine and her internship at University of Southern California- Los Angeles County Medical Center. She went to medical school in New York at the Albert Einstein College of Medicine [MD in 2001]. Going into medical school she was sure she was not going to be an OB-GYN after seeing her father working long hours and doing many middle of the night deliveries. However she fell in love with the field as soon as she started her rotation and has never regretted the decision to go into the same field as her father and brother. Having two children, she understands the joys and tribulations of being a mother. She speaks Spanish.”
